Why do you want to represent the voters in your municipality?

- Participate in the municipality's economic development.
- Ensure residential development that respects the municipality's architecture while preserving its built heritage.
- Promote tourism (without being excessive) for year-round benefits.
- Preserve the environment and ensure that the right decisions are made to maintain the health of our lake.
- Ensure that current infrastructure is maintained in good condition and remain open to developing new niches.

How would you like to improve the quality of life to voters?

The council must ensure that it maintains a reasonable tax rate while keeping municipal services at the highest level. Every citizen must feel respected by the council's decisions. A good quality of life requires sound management of public funds and simple, transparent communication.

What are your two main priorities?

- Rigorous budget management
- Encourage young people to take an interest in municipal politics to ensure a new generation of leaders and foster a sense of pride and belonging among local youth. Retaining young people brings continuity and ensures the survival of small communities.
